

PLAS-TIES

CABLE TIE INSTALLATION TOOLS

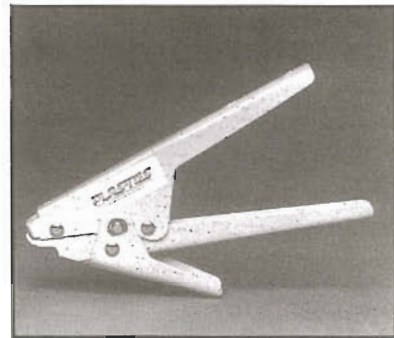

P-100

A lightweight durable hand tool for use by people in non-assembly applications. Tension is installer-controlled and with a twist of the wrist it easily cuts the tie clean. This light duty tool is recommended for use on all 18 and 30 pound tensile rated ties. An absolute must for every toolbox!

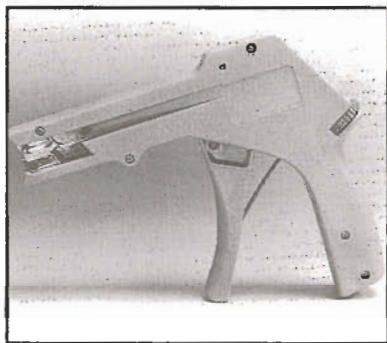

P-200

An adjustable tool that installs all 18, 30 and 50 pound ties. It is an all metal tool designed with a small hand grip and short stroke to minimize operator fatigue. It gives uniform tension and cuts in one smooth stroke. The P-200 attacks every job with vigor and is virtually indestructible!

P-300

A heavy duty tool designed to be used with our 120 and 175 pound ties. A rugged, all metal tool, it allows the operator to adjust the strap to any required tension. The strap then easily cuts off. Conveniently hangs from work belt and built for durability and performance, An absolute must for the larger diameter jobs!

P-400

The P-400 tensioning tool is Plas-Ties highest quality, assembly line tool. Adjustable for the 18 through 50 pound series of ties, it will consistently cut the tie cleanly, and leaves no sharp edges or nubs to interfere with your operators. The feather-weight P-400, acts as an extension of your own hand and is the tool you want on your side to get relief from "Dead Arm Syndrome."

P-500

The P-500 is designed to combine maximum productivity and speed with operator comfort and safety. The adjustable, pre-set tension results in uniform cable tie application, neater bundles and more efficient harnessing. The slim nose construction allows easy positioning in hard to reach areas.
